ESSENTIALS OF ARTIFICIAL INTELLIGENCE

INDIVIDUAL CONTRIBUTION SHEET

Student Name	K.D.S.T. Nethmi	**Registration No.**	D/DBA/25/0039
Degree / Intake	DBA / Intake 42	**Group No.**	25
Project Title	An Intelligent Deepfake Image Detection System (DeepGuard AI)		

Technical Contributions:

Task / Component	My Contribution	Tools / AI Technique Used	Evidence / Output
Model evaluation review	Examined the E8 CNN outputs chosen and noted its limit, measurements and disadvantages, helped finalize the project paperwork.	CNN TensorFlow/Keras evaluation metrics	Final report: E8 evaluation and comparison sections, model documentation.
Web interface	Recreated the DeepGuard AI responsive site, including the menu, data on projects, explanation of the work process, upload/preview and results page.	HTML, CSS, JavaScript; Flask integration	web/templates/index.html, web/static/style.css, web/static/script.js, merged UI pull request.
Application verification	The application was run in the local environment and the entire procedure of uploading images to the classifier has been verified, along with the corresponding output obtained.	Flask MediaPipe CNN inference Docker	Working localhost demonstration, successful image prediction test.
Production Docker setup	Docker dependencies have been updated to enable the use Flask with Gunicorn, having just a single worker and variable PORT; the image was created and tested locally.	Docker Gunicorn Python TensorFlow	Dockerfile; requirements-docker.txt; successful deepguard-production build and run; merged deployment PR.

Project documentation	Revised both README files with instructions on installation, model operation, API, limitations and deployment status; handled documentation branches, commits and PRs.	Markdown Git GitHub	Root and application README.md, merged documentation pull requests and commit history.

Declaration

I confirm that the contributions listed above accurately represent my individual work in this group project, and I can explain or demonstrate the stated work if required.

Student Signature:  **Date:** ___2026/10/17_____

Evidence may include source code, model/notebook, diagram, dataset work, test results, screenshots, report section or presentation slides.
