ESSENTIALS OF ARTIFICIAL INTELLIGENCE

INDIVIDUAL CONTRIBUTION SHEET

Student Name	SPKTC Perera	**Registration No.**	D/BIS/24/0007
Degree / Intake	BIS / Intake 41	**Group No.**	25
Project Title	An Intelligent Deepfake Image Detection System		

Technical Contributions:

Task / Component	My Contribution	Tools / AI Technique Used	Evidence / Output
Risk-assessment concept	Took ownership of the proposed fuzzy risk assessment approach, which combines the model's confidence score with image quality indicators.	Fuzzy logic (design stage)	Concept design - report pg 16
Risk-level definitions	Defined the Low, Medium and High risk categories for the proposed advisory layer.	Fuzzy linguistic variables	Risk-level descriptions - report pg16
Rule-based advice	Drafted example IF–THEN rules that give guidance when no face is found, when the risk is uncertain, and when it is high.	Expert-system / rule-based reasoning (design)	Example advice table - report pg 16
Responsible output	Made clear that the system's output is uncertain and should be independently verified, not taken as proof.	Decision-support principles	Report pg 9, 16, 18
Scope documentation	Stated plainly that the fuzzy logic and expert-rule features are proposed work and have not yet been integrated and verified.	Requirements and documentation	Report pg 3, 8, 12.5, 16

Declaration

I confirm that the contributions listed above accurately represent my individual work in this group project, and I can explain or demonstrate the stated work if required.

Student Signature:  **Date:** 10.17.2025

Evidence may include source code, model/notebook, diagram, dataset work, test results, screenshots, report section or presentation slides.
